

RESPONSIBLE RECYCLING PROGRAM

Over 20,000 lbs. of recycled polyethylene annually translates into these energy-equivalent savings:

- **102 metric tons** of GHG prevented or taking 5 cars off the road
- **72,000 KW hours** of electricity or enough energy saved to power 70 homes
- **70 cubic yards** of landfill space or the equivalent of what 1,100 people generate a month
- Saved approximately **110 barrels of oil**
- Saved roughly energy equivalent of **5,600 gallons of gas**
